The sequence of courses suggested may not fit the circumstances of every student. Students should contact their advisement center for help in outlining an efficient schedule.

Students are encouraged to complete an average of 15 credit hours each semester or 30 credit hours each year, which could include spring and/or summer terms. Taking fewer credits substantially increases the cost and the number of semesters to graduate.

**THE DISCIPLINE**

Financiers are the gatekeepers of the money within an economy. Finance is the study of the entire process from both sides—the financier holding the financial capital and the entity requesting the use of that capital. It explores how and under what conditions financial capital is transferred from the financiers to the corporations, governments, and individuals seeking to use the money.

In a way, finance is the study of how to most effectively and efficiently get financial resources from the financiers to the people who will create the next revolutionary product or service. The finance major offers a broad set of tools and insights regarding how to most profitably employ and allocate monetary resources.

Students will study the efficiency of the markets in which all these transactions take place and learn about ways in which all participants in the financial system can reduce or hedge the various risks they face.

**CAREER OPPORTUNITIES**

Finance graduates work in a variety of fields that include but are not limited to: asset manager, commercial banker, corporate financial planning analyst, corporate treasury analyst, consultant, credit analyst, equity analyst, investment banker, private wealth advisor, and securities or commodity trader.
