BA in Anthropology: Archaeology (732034)2022-2023 Program Requirements Cont...

THE DISCIPLINE
Anthropology seeks to explain the similarities and differences in human behavior patterns among all peoples and cultures, both in the present and the past. Anthropology studies the human past, incorporating methods from the social sciences, natural sciences, and humanities. Students learn about past human cultures as well as methods for excavating and analyzing the material remains left by past human activities.

The archaeology program at BYU also includes training in technological applications. Students have opportunities for hands-on experience with using drones, digital mapping, 3-dimensional modeling, digital data management, computer modelling, and scientific methods of artifact analysis.

FINANCING
Many students find employment as teaching or research assistants. Most of our students obtain summer jobs that make use of their training and interests.

CAREERS
Many archaeology majors find employment in state and federal agencies that manage archaeological sites and enforce preservation laws. Private engineering firms and environmental consulting firms also hire archaeologists to help meet preservation requirements.

A few graduates go on to university teaching and research positions, but these are limited and require completion of a PhD.

Archaeology students also acquire highly valued transferable skills in writing, critical thinking, data management, and technological applications that make them well-qualified for further education or careers in almost any field.

MAP DISCLAIMER
While every reasonable effort is made to ensure accuracy, there are some student populations that could have exceptions to listed requirements. Please refer to the university catalog and your college advisement center/department for complete guidelines.
